YOUR BOOK OF
INSPIRATION

BECAUSE DETAILS MATTER...

There it stands. Handmade, flawlessly finished and painted in that colour that you can't help but smile at, but your cabinetry's not finished, yet. Enter handles, knobs, latches and pulls – those finishing touches that enhance your cabinetry's artisanship and elevate its design, instantly and effortlessly.

Curated into three core collections, first you'll discover Elements. Think of these as elegant but also entry-level in terms of price before moving into Core and finally The Refined Collection, our most premium handles of all.

To make choosing your handles as easy as possible, we've also grouped handles that share the same design language within each edit. Take Didsbury from our Core Collection. There's the knob, the bar and T-bar, so that you can have the same style of handle across your room but with subtle variation. You might want the bar handle on a drawer stack but knobs on a countertop cabinet, and this way, you'll satisfy both function and form.

From polished bright copper to smooth matt black and from contemporary chrome to classic cast iron, there's a world of options in the pages that follow.

THE

ELEMENTS

COLLECTION

Think of handles like punctuation. What do you want them to do to your decor? To encourage you to pause as your eye moves around the room? To raise eyebrows, cause a stir and change the pace? To round things off and bring your decor to a calm, considered conclusion? With the combination of affordable materials and on-trend finishes in our Elements Collection you can instantly enhance your aesthetic, because it's the little touches that matter just as much as the large...
